

**St Michael's CE Primary School**  
**Our Curriculum Drivers: Computing**

<b>Curiosity</b>	<b>Determination &amp; Resilience</b>	<b>Responsibility</b>
<p>Computing at St Michael's encourages children to explore the digital world with curiosity and creativity. Pupils are inspired to investigate how technology works, experiment with coding, and discover how digital tools can solve problems and express ideas. We nurture a sense of excitement and wonder in exploring the possibilities of computing in everyday life.</p> <p><i>"Fostering the joy of anticipation, investigation and discovery."</i></p>	<p>Computing challenges children to think logically, debug errors, and persevere through trial and improvement. We support pupils in developing resilience when solving coding problems and determination when learning new digital skills. Through hands-on experiences, children build confidence, creativity, and pride in their ability to overcome challenges and innovate.</p> <p><i>"We want children to develop and hold attitudes and abilities including self-awareness, resilience, assertiveness, creativity, pride, problem solving and self-advocacy skills."</i></p>	<p>Our computing curriculum helps children understand the importance of using technology safely, ethically, and responsibly. Pupils learn about online safety, digital citizenship, and the impact of their actions in the digital world. We encourage children to make informed choices, respect others online, and take ownership of their digital footprint.</p> <p><i>"Responsibility involves making decisions, being trusted, and learning to take credit for one's actions – whether good or bad."</i></p>
